

P.r.

Project testing

Demonstrate the use of testing in your program, passes, failures.

```
2 passing (11ms)
1 failing

1) stock_2x4 should check total:

  AssertionError: 5 == 2.4
    + expected - actual

    -5
    +2.4

    at Context.<anonymous> (specs/ld_optimizer/stock_2x4_spec.js:20:12)

npm ERR! Test failed.  See above for more details.
➤ test git:(master) x
