Testing task 1 code:

Carry out static testing on the code below.
Read through the code. Highlight and correct any errors you can see.

```
1          def func1(val)
2            if val = 1
3                  return true
4            else
5                  return false
6            end
7          end
                    def
8
9          dif max a b
10           if a > b
11             return a
12           else
13             b
14           end
15           end
16           end
17
18         def looper
19           for i in 1..10
